

Statement Corona-Pandemic

Our current delivery situation

Dear business partners,

The coronavirus can affect our daily business significantly. The situation in Europe is rather unpredictable and changing on a daily base. We all are affected by the set of necessary actions that is currently taken by authorities and companies to protect the health of all us. Currently we are checking the supply chains to ensure the availability of our products. To avoid any influence, we deal with this topic seriously and follow developments closely.

We cannot determine long-term effects yet and we all hope to return to normal circumstances soon. For now we do not expect any delivery difficulties due to following facts:

- Almost all of our colleagues are working from their home offices
- A large scale of purchased items are sourced from European suppliers
- Few items (for example circuit boards) from China will be changed to German suppliers, if necessary
- Our suppliers have to report any bottlenecks immediately
- Your incoming orders are checked carefully with regard to their ability and to the delivery time
- In case of unexpected delays we will contact you immediately

We are confident that we all can commonly overcome this challenging situation.

Please take care of yourselves, your families and your fellow colleagues. Stay safe and healthy!

With best regards from Barleben

Your PROMECON Team
